

Cullum received a request from an established key customer to order and ship vent fan belts to a power generation site in Massachusetts. The order was sent to Cullum at 7:30pm on a Thursday with a plea for the parts to arrive at site on Friday.

As soon as our suppliers were at their desks, Cullum contacted them and reserved the parts while simultaneously using their range of shipping suppliers to find the best possible routing to the site.

Given the site location, no courier was able to offer next day delivery to site but Cullum were able to propose collection by our customer at the airport on the Friday.

Our scope can include:

- **Extended Spares Service**
- **Replacement items and fabrications, including;**
- **Retention and Fire Damper Spares**
- **Combustion Intake, Exhaust and Ventilation Silencers**
- **Duct sections (on short deliveries, where required)**
- **Enclosure items, such as door furniture, hinges, lights, limit switches and gaskets and seals**
- **Filter House components such as instrumentation gauges, limit switches & transmitters and filtration elements for all filter types**
